

**GLORY TO
PRESIDENT
THOMPSON
AND THE UPA**

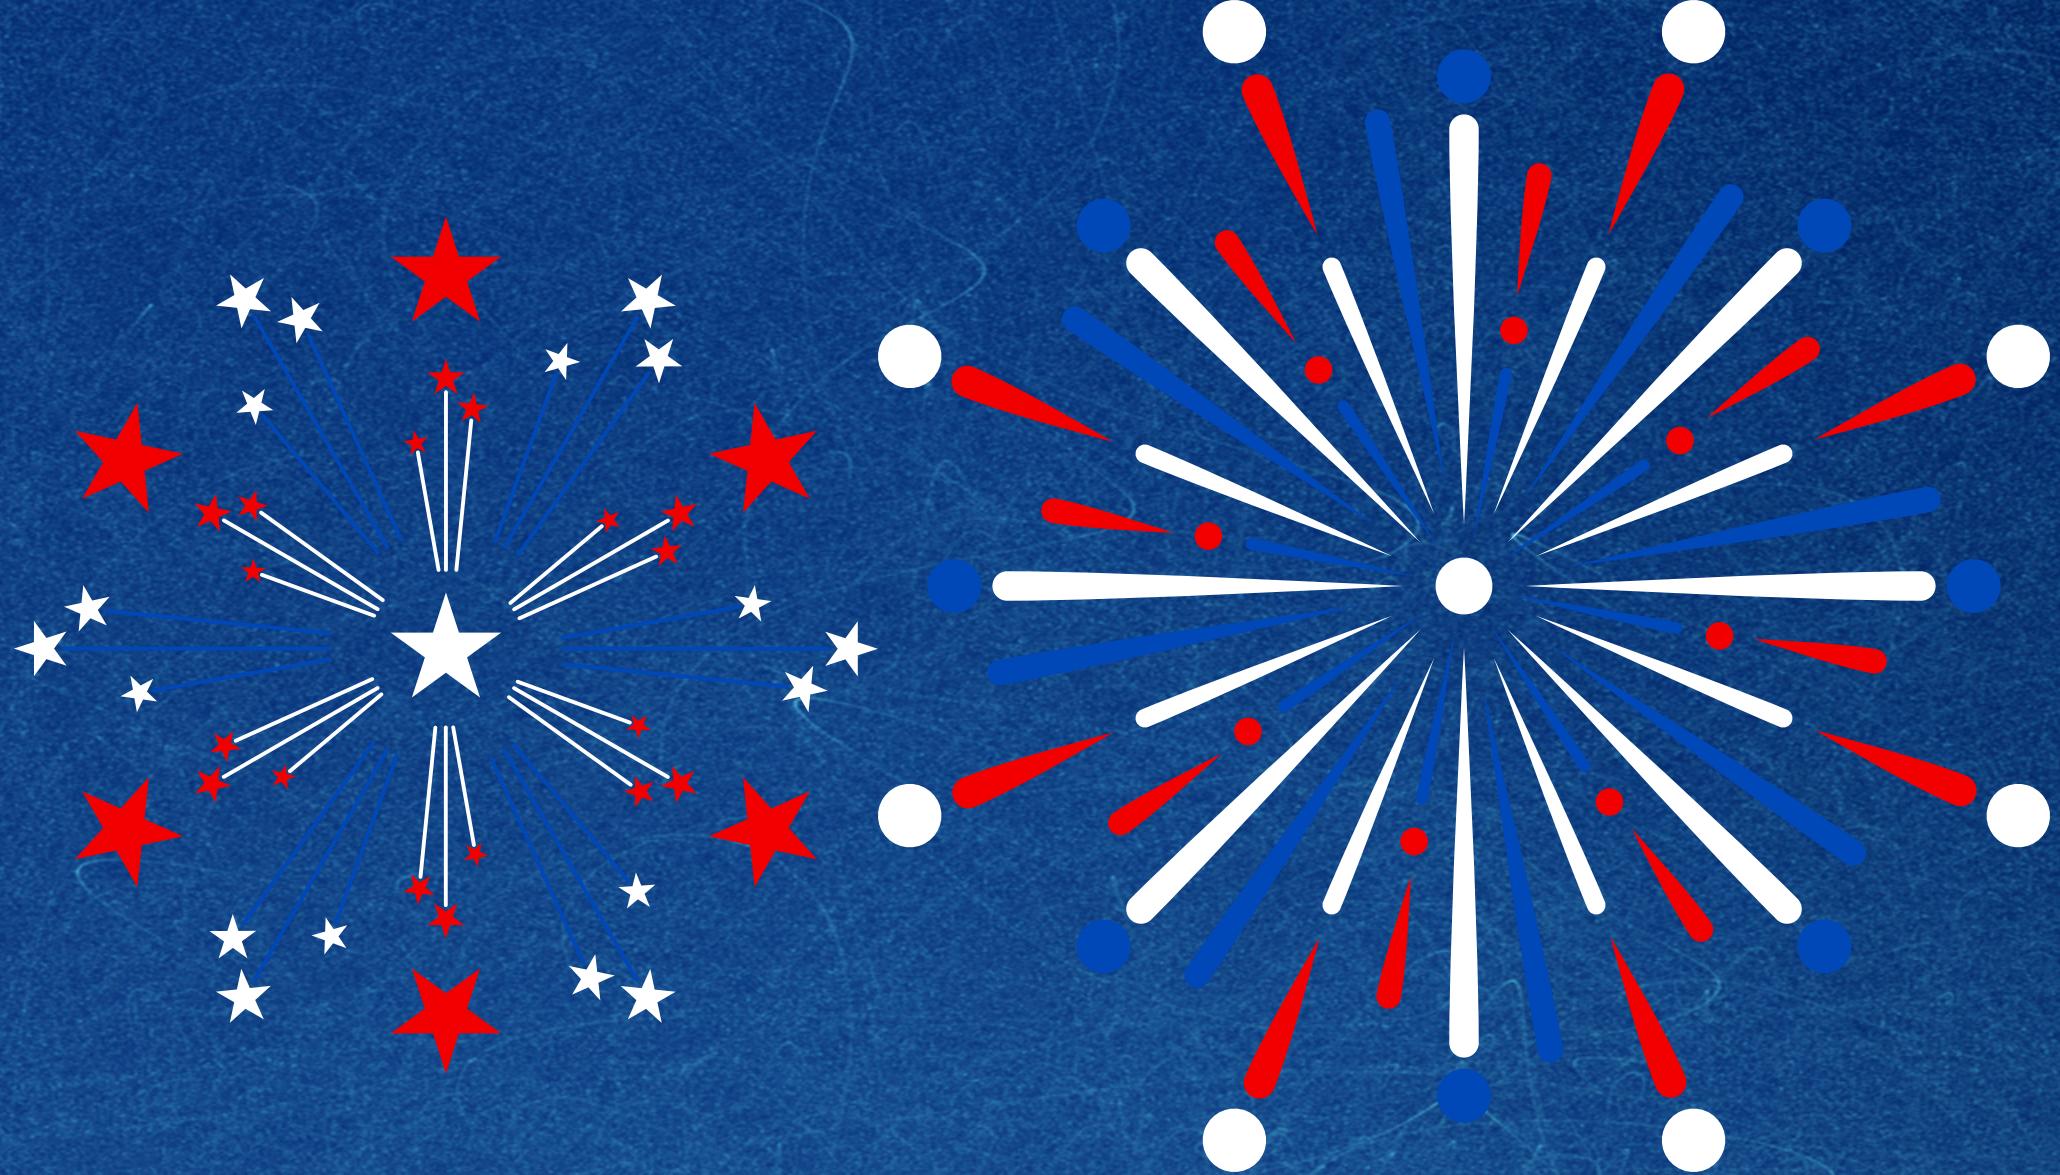

Every day it's harder to believe that just over fifty years ago, the present marvelous triumphs brought about by President Dan Thompson and his administration would have been an unthinkable feat; a nation divided by internal warfare and rebellious ideology would not attain the unthinkable level of liberty we have in the past few years. And while that distant, fleeting jeopardy of our rights may seem impossible—like something you would just eye in a history book—it was Amerika's reality, and that reality was only neutered due to years of work. That is why it is a vital, essential task to take note and inform the people of President Thompson's stream of triumphs—a stream that is not likely to fizzle out any time soon.

Go look at the nations above and below us struggling through revolting instability and a never-ending divide; the United Patriots of Amerika stands against those phenomena. Though President Thompson's nominal efforts to annex these upper and lower territories proved fraught, either of them are now feeling the result of the UPA's trade war and tariffs. Still, the Thompson administration has said that they are not planning to ever step down until both nations give in, going as far as to give both nations an ultimatum, with a potential assertion of war pending in the distant future. The United Patriots stands in solidarity with the UPA government and President Thompson.

Go figure, upon merging into a single nation state years and years ago, many towns in the UPA have seen all-time high numbers in every relevant area. The newest report from Thompson-appointed representative John Isaak Kary of the Board of Knowledge and Health has laid out this data. “Lawbreaking rates are at an all-time low around the nation; unemployment dropped to a staggering 2.6% thanks to AI and Android workers; Amerikan oil and goods are being bought at an all-time high; government-funded, tutor-approved publishing businesses like “Partisan Print” have got plenty to see in the realm of pro-UPA books, headed to thousands of institutes and libraries...”

On the matter of media, where the UPA is now a leading assembly mill, it has been stated that in 2082 alone, over nine hundred books, four thousand songs, three hundred films, and more than a hundred video games were released to the nation. These numbers are substantially higher than they were in 2081. After the Media Regulation Bill of 2046, the UPA has put forth great effort to suppress and seize all pro-rebellion media and maintain our nation's safety and purity from terrorism. It ought to be reiterated that home-grown terrorists have walked our home soil in the not-so-distant past, and that rebellion will always be met with proper punishment.

The United Patriots of Amerika remains to thrive as a prosperous nation, all at the helm of President Thompson and his glorious administration. The nation we inhabit today rides on years upon years of labor from brilliant, loyal men and women, and that's a point that ought not be forgotten.
